Re: CSXT Abandonment filing AB 55 Sub No. 648X

Dear Mr. Novecki:

On May 10, 2004 CSXT filed to abandon a rail line segment between Moorman and Wilson Station, Kentucky (AB 55 Sub No. 648X). The Environmental Assessment for this filing was dated June 4, 2004 and issued a Section 106 on the only bridge on the line segment since no comments had been received from Mr. David Morgan the Kentucky State Historic Preservation Officer. After consulting with Mr. Morgan's office over the last several months, CSXT has been successful in providing enough information for Mr. Morgan to have come to the determination that *"...this bridge is not eligible for listing in the National Register of Historic Places and we have no objections to its removal. The proposed project will not impact nay National Register properties or sites."*

In light of the above and attached letter from Mr. Morgan, CSXT respectfully requests that the Surface Transportation Board remove the Section 106 from this abandonment as soon as possible.

Please feel free to contact me should you have any further questions.

Sincerely,

A handwritten signature in dark ink, appearing to be "Archie Arthur", with a long horizontal stroke extending to the right.
